Maya Chen

Senior Software Engineer at Northwind Cloud · Open-source maintainer of quillstream

Seattle, Washington, United States

Summary

I build streaming data infrastructure. I created quillstream, an open-source log-shipping library used by more than 40 companies, and I speak at systems conferences about backpressure and reliability.

Experience

Northwind Cloud

Senior Software Engineer

March 2022 - Present (4 years 8 months)

Seattle, Washington, United States
